*LIHEAP applications need to be completed only once per year between July 1 and June 30 of each year.*

*LIHEAP applicants are referred to the Weatherization Assistance Program (WAP) if requested on the LIHEAP application or you may call your local Neighborhood Service Center (NSC) listed above.*

**NOTE: A separate WAP application is required to be completed.**

Last year LIHEAP funding thru UETHDA, Inc. provided approximately 10,266 households with utility assistance based on a priority points system including low-income, elderly, disabled, etc.

Through LIHEAP funding UETHDA, Inc. assisted approximately 5,456 senior citizens and 7,347 individuals with disabilities. The assistance helped maintain clients independent living situations.

## **COST EFFECTIVE HEATING TIPS**

- Change light bulbs to CFL bulbs (Compact Fluorescent Lights)
- Keep bulbs clean. Dust can cut light output as much as 25 percent.
- Turn off lights when not in use. A 100-watt bulb left on overnight costs approximately \$25 annually.
- Water heating can account for 14%–25% of the energy consumed in your home.
- ENERGY STAR labeled products can cut your energy bills by up to 30 percent: [www.energystar.gov/](http://www.energystar.gov/)
- Install a programmable thermostat that can adjust the temperature according to your schedule.
- In winter, turn down thermostat five degrees. Each degree saves approximately 2 percent on your heating bill.
- By resetting your programmable thermostat from 72 degrees to 65 degrees for eight hours a day (for instance, while no one is home or while everyone is tucked in bed) you can cut your heating bill by up to 10 percent.
- Turn off stand-by power, i.e. computers, etc. as these can count for up to 20% of energy use.
